I design and build software that feels like an instrument, with 10+ years shipping products as a founder, designer, design engineer, and product manager

EXPERIENCE

Sunshower Audio · Founder & Design Engineer 2025 – Present

- Launched BigCity, a one-knob audio plugin adopted by leading electronic music producers, by owning everything from user research and wireframes to high-fidelity designs, coded prototypes, and 2 rounds of beta testing
- Kept BigCity under 1% CPU per instance by refactoring C++ with Claude Code while passing pluginval's strictest tests

Manta · Co-founder, Head of Design & Product 2023 – 2024

- Saved 12 vets ~480 hours a month by designing an AI assistant that writes SOAP records from voice notes
- Brought the MVP to 2 pilot hospitals by leading all user research (hospital shadowing, 15+ vet interviews, and usage analytics), prototyping, and beta testing
- Cut UI build time 30% by building a Figma design system from scratch and directed the company brand

Lattice · Senior Product Manager 2022

- Raised navigation CSAT 15% and cut time to open a review 20% by redesigning Lattice's information architecture, using card sorts, user interviews, wireframes, and prototypes to regroup a 13-item sidebar around tasks
- Grew Company Pages DAU/MAU 25% by redesigning it around user delight with celebrations, feedback, and key links

atSpoke (acquired by Okta) · Product Manager II 2020 – 2022

- Halved onboarding time and lifted free-to-paid conversion from ~0% to 16% for users who finished it by replacing an empty first screen with onboarding tailored to each user's role, ending in a practice ticket in the first minute
- Rolled out 8 integrations that reached 20% of all users within 3 months, leading my team's user research, prototyping, and beta testing
- Shipped a Notion Slack bot that Notion featured in the keynote at its first conference

Meta · Product Specialist 2018 – 2020

- Reduced negative Facebook Memories reports 45% in 1 week by using SQL to find why exes showed up as close friends, then leading the fix

Deloitte Consulting · Consultant 2016 – 2018

- Delivered an MVP healthcare analytics platform in ~6 months, built for the Military Health System's 63K+ users, by wireframing features and building 10+ dashboards with SQL, R, and Tableau

EDUCATION

University of Virginia · B.A. Foreign Affairs, minor in Global Commerce 2016

SKILLS

Design: User research, usability testing, card sorting, information architecture, interaction design, wireframing, prototyping, design systems, data visualization, accessibility (WCAG)
Tools: Figma, Framer, Affinity, DaVinci Resolve, Tableau, Ableton Live, Claude Code, GitHub, Vercel
Code: TypeScript, JavaScript, HTML/CSS, C++, SQL, R · Astro, JUCE, three.js, WebGPU, Web Audio API

ADDITIONAL INFORMATION

Music: Supported Said the Sky, Slander, Habstrakt, and Forester at Insomniac clubs as [yaku] and released debut EP *voicemails* in 2025
Spoken languages: English (native), Spanish (conversational), Japanese (beginner)
Community service: Career mentor for University of Virginia students going into tech
Interests: Analog photography, biking, gaming, snowboarding, traveling
